Among the projects Jimmy walks you through are:

- Leather knife sheath and backpack
- Machete made from a saw blade
- Band saw–cut sign with CNC-milled lettering

Jimmy's philosophy: "Staying humble and looking for the lesson in any situation inspires you to make your own projects your way.

The builds detailed in this book include working with wood, metal, plastic, and leather. If you're looking for inspiration, new ways of thinking, and tips that will enhance your workshop skills, this is the guide for you!
DIY/Education guide her engineering students through design projects. She often met Dr. AnnMarie Thomas was inspired to answer that when she tried to ration led all the way back to the childhood of her subjects and applying » Chris Anderson, co-founder of 3D Robotics

Written for parents and educators,
is an Associate Professor in the School of Engineering at the US  $19.99   CAN  $20.99

Islandora Publishing

In this book, you’ll learn how to make fun and creative paper inventions of your very own. Learn about the history of papermaking and how to use simple

- A paper generator that creates electricity when you tap or rub it
- A space rover that moves thanks to paper machinery

In this book, you'll learn how to make:

- Simple Flying Things: Planes, Gliders, and Paper Rockets
- Making Makers
- Tinkering, Second Edition
- Make: The Annotated Build-It-Yourself Science Laboratory

DRONES & ROCKETS

Make: Drones
Make: Rockets
Make: DIY Drone and Quadcopter Projects
Make: Getting Started with Drones

ROBOTS

Make a Mind-Controlled Arduino Robot
Make a Raspberry Pi-Controlled Robot
Make an Arduino-Controlled Robot
Make Projects: Small Form Factor PCs
Make: Arduino Bots and Gadgets
Make: JavaScript Robotics

To become makers, children must be allowed to explore their interests and the world around them.”

— ANNMARIE THOMAS, Making Makers
By learning how technology works, you become better able to control your world instead of being controlled by it.” — CHARLES PLATT, Make: Electronics
